Introduction

1. In its latest reply to the note of the Secretary-General of UNCTAD dated 23 May 1986, the Government of Japan provided information on total, dutiable, covered and preferential imports of products falling within the Harmonized Commodity Description and Coding System (HS) chapters 1 to 24 and 25 to 97 from beneficiaries of its scheme of generalized system of preferences for fiscal year 1990. 1/

Imports by Japan from beneficiaries of its scheme in fiscal year (FY) 1990

2. Table 1 shows the total of the above-mentioned categories of imports from all beneficiaries and various groups of beneficiaries. In FY 1990 imports were recorded from 148 beneficiaries of which 9 did not have MFN dutiable trade and another 18 had MFN dutiable trade not covered by the scheme, leaving 121 which supplied goods covered by the scheme, of which 91 actually received preferential treatment. 2/

3. As may be seen from table 1, total Japanese imports for all supplying beneficiaries amounted to $116.2 billion in FY 1990 3/ which represented 48.6 per cent of total imports from all sources ($239.3 billion). Some $101.7 billion or 87.5 per cent of these imports consisted of industrial products in HS chapters 25 to 97, with the remaining $14.6 billion or 12.5 per cent accounted for by agricultural products in HS chapters 1 to 24. Dutiable imports accounted for $78.5 billion or 67.5 per cent of these total imports. Imports covered by the scheme amounted to $23 billion or 29.3 per cent of dutiable imports. Around 48 per cent ($11 billion) of these covered imports received preferential treatment. Industrial products constituted the bulk ($8.6 billion or 78 per cent) of imports which actually received GSP treatment.

4. The rate of utilization (i.e. preferential imports as a percentage of covered products) amounted to 47.7 per cent, while the rate of agricultural and industrial products amounted to 90.7 per cent and 42.1 per cent, respectively. The relatively higher rate of utilization for agricultural products can be explained by the absence of a priori limitations contained in HS chapters 1-24.

5. Nine major beneficiary suppliers accounted for $59.9 billion or 51.5 per cent of total Japanese imports from all beneficiaries. Some $37.4 billion or 62.4 per cent of these total imports were dutiable, of which $18.4 or 49.3 per cent were imports covered by the scheme. Some 44 per cent ($8.2 billion) of these covered imports actually received preferential treatment. These nine major beneficiaries supplied 80 per cent and 74.1 per cent of covered and preferential imports from all beneficiaries. Industrial products in HS chapters 25-97 accounted for the bulk of covered and preferential imports from all supplying countries or territories. Ranked by order of value of trade covered by the scheme, these major supplying beneficiaries were: Republic of Korea, China, Taiwan (Province of China), Brazil, Hong Kong, Thailand, Philippines, Indonesia and Chile. The first three major beneficiary suppliers above accounted for 73.9 per cent and 70.8 per cent of covered and preferential imports from all beneficiaries.

6. Japanese imports of covered products from ACP and Mediterranean countries, 4/ which enjoy special tariff preferences in the EEC market, amounted to $723 million and $292 million, respectively, which altogether represented 4.4 per cent of total covered imports from all beneficiaries. However, the rate of utilization, which amounted to 55.8 per cent, is higher than the average of that in favour of all beneficiary suppliers seen above.

7. Table 1 also indicates that Japan recorded imports from 35 least developed countries (LDCs) 5/ amounting to $663 million of which $395 million or 59.6 per cent were dutiable. Of these dutiable imports, $157 million or 39.7 per cent were covered by the scheme while $155 million actually received preferences. The rate of utilization amounted to 98.3 per cent. Of the 35 LDCs exporting to Japan in 1990, 5 did not have dutiable imports, 6/ 5 others did not have imports covered by the scheme 7/ and of the remaining 25 which supplied goods eligible for preferential treatment, 8 failed to receive preferential treatment. 8/

8. Thus the following 17 LDCs (listed in order of their covered exports) actually benefited from the scheme: Mauritania, Gambia, Bangladesh, United Republic of Tanzania, Nepal, Myanmar, Ethiopia, Bhutan, Botswana, Haiti, Lao PDR, Malawi, Sudan, Lesotho, Maldives, Mali and Rwanda. The first three LDCs together supplied 94.3 per cent and 95.3 per cent of covered and preferential imports, respectively.

Major products imported under the scheme in FY 1990

9. Table B of the annex shows the value of Japan's imports in FY 1990 of (I) Agricultural products and (II) Industrial products covered by its scheme as defined at the HS 4-digit level from the world and beneficiary suppliers as well as the value of imports of these products which effectively received preferential treatment.

10. Imports of major products from beneficiaries in 1990 amounted to $18.7 billion or 81 per cent of the total covered ($23 billion), in which imports of major agricultural products from beneficiaries amounted to $2.2 billion or 84 per cent of the total covered ($2.7 billion), while imports of major industrial products amounted to $16.4 billion or 80.6 per cent of the total covered ($20.3 billion) in 1990. Some 86.2 per cent of these agricultural products in FY 1990 received preferential treatment. The rate of utilization was almost 69 per cent in FY 1990 in the case of industrial products.

11. The following 11 agricultural products as defined at HS 4-digit level represented the most important items among these categories in FY 1990: HS 03.07 Molluscs ($570 million); HS 16.04 Prepared or preserved fish ($524 million); HS 08.03 Bananas ($400 million); HS 16.05 Crustaceans, molluscs prepared ($220 million); HS 07.12 Dried vegetables ($108 million); HS 15.11 palm oils ($101 million); HS 12.11 Plants and parts of plants ($81 million); HS 07.09 Other vegetables ($67 million); HS 22.08 undenatured alcohol ($59 million); HS 21.01 Extracts of coffee, tea ($57 million); HS 06.03 Cut flowers ($56 million).

12. Seventy-three industrial products as defined at the HS 4-digit level represented the most important items among these categories in 1990. 9/ The most important among them were: HS 76.01 Unwrought aluminium ($1,735 million); HS 72.08 Flat-rolled products of iron not clad plated, hot-rolled ($1,367 million); HS 74.03 Refined copper ($1,235 million); HS 61.10 Jerseys, pullovers ... knitted ($1,203 million); HS 62.04 Women's or girls' suits, ensembles ($602 million); HS 42.02 Trunks, suitcases ... of leather, textile materials ($569 million); HS 62.01 Men's or boys' overcoats ... ($459 million); HS 62.03 Men's or boys' suits, ensembles ($418 million); HS 71.13 Articles of jewellery ($370 million); HS 72.02 Ferro-alloys ($366 million); HS 64.04 Footwear with uppers of textile materials ($334 million); HS 62.05 Men's or boys' shirts ($318 million); HS 95.03 Other toys ($305 million); HS 62.11 Track suits, ski suits ... ($299 million); HS 64.03 Footwear with uppers of leather ($269 million); HS 61.09 T-Shirts, singlets ... ($263 million); HS 62.02 Women's or girls' overcoats ... ($261 million); HS 72.09 Flat-rolled products of iron or non-alloy steel ... not clad plated, cold-rolled ($252 million); HS 62.06 Women's or girls' blouses ... ($242 million); HS 44.07 Wood sawn ($225 million); HS 39.26 Other articles of plastics ... ($219 million). It should be noted that imports of covered textiles and textile products falling within HS chapters 50 to 63 represented nearly 34 per cent of total covered industrial imports, while imports of covered base metals and articles thereof represented around 31 per cent of total covered industrial products.
